

As a professional truck driver, I find X M radio a valuable asset in my truck cab. Instant Traffic and Weather are a great improvement over having to find a local radio station that may or may not provide this information. And the fact that it is repeated, and updated in a timely manner makes it easy to use. When in a major city where I'm not familiar with the roads, it gives me time to stop and look at a map while the broadcast is repeated, as opposed to trying to find a local station that may run this information in a fifteen second spot that includes background noise or music trying to be entertaining, instead of informative. X M radio also improves safety, as I am not constantly changing stations on the radio, which allows me to pay attention to my primary job.....MOVING 80,000 LBS OF TRUCK AND TRAILER in traffic and people not paying attention. I don't see how having X M radio provide this service is a problem for local stations as they don't provide this service with any degree of importance that to me it deserves. Another point I PAY FOR THIS SERVICE, I don't need commercials, for the most part they are wasted on me as I probably won't shop there anyway, I need information. Don't mess up a good thing. Someone finally got it right. X M RADIO did..
